International Master
Physics Photonics Nanotechnology
University of Bourgogne Franche Comté – Dijon – Besançon – France

Two-year and one-year Master programs leading to a degree in Physics with specialties in:

**Photonics and nano-optics**

*Ultrafast femtosecond optics*

*Solitons, optical fibre communications, and opto-electronics*

*Quantum physics, spectroscopy and quantum information*

*Laser technology, quantum technology and nanotechnology*

*Nanobiosciences*

Research training in laboratory (five months)
